# GUARDSHACK™

## ENCLOSURES

GuardShack's™ powdercoated steel enclosure line offers extensive protection for a wide variety of applications and in many price ranges. GuardShack™ Enclosures never have any sharp corners or edges & are always powdercoated to exacting standards for lasting durability and lower maintenance costs.

### Small Powder-coated Enclosures

Our wide range of sizes can accommodate nearly any backflow device and also a wide range of valuable equipment such as pumps, meters and automatic control valves, etc. All tamper resistant hardware is supplied with each unit.

GuardShack™ manufactures enclosures that will accommodate over 4 dozen different backflow assemblies inside their rugged yet attractive units. Besides offering great vandal and theft protection, these beautifully designed enclosures, gracefully enhance the appearance of any building or site. Standard colors include our high gloss Forest Green and Woodland Tan.

Custom enclosures and colors are available (consult factory).

# HGS SERIES

HGS-I

The HGS is constructed with strong schedule 40 steel pipe and expanded metal. They come standard with our improved integrated Lock Shield Bracket designed to protect more styles of locks from bolt cutters.

(SHOWN WITH OPTIONAL ENCLOSURE SETTER)

**INTERNAL MOUNTING:** All mounting points on the HGS are internal and can not be accessed unless the cage is open. The HGS deters prying with only a 3/8" gap between the pad and enclosure.

**HINGED GATE:** Our body with gate design allows for full use of the HGS's internal dimensions, eliminating any clearance issues allowing a smaller enclosure to be used. Additionally only one lock is needed.

**QUICK & SECURE INSTALLATION:** For maximum security and easy installation, use the optional Enclosure Setter. The setter is simply laid into the wet concrete and the cage's hinges fasten to the protruding setter screws.

## Large GuardShack™ Enclosures

Backflow enclosures for large devices no longer have to be unsightly! The GS-5 through GS-8.5 enclosures are GuardShack's attractive, powder-coated 2 piece clamshell models for 2½" through 8" backflow assemblies. GuardShack's GS-9 and GS-10 enclosures are by far the largest standard enclosures available in the industry. Constructed in 3 and 4 sections respectively, the unique telescoping ability of the GS-9 and GS-10 models, allows you to size them properly for all your 8"-10" assemblies. Use the GS-10 to cover and beautify extremely long units with attached meters, filters, automatic control valves, etc.

(See back page for sizing information)

## Tall GuardShack™ Enclosures "M" series and "NP" series

These enclosures provide excellent vandal and theft protection for PVB and angle ("N") pattern devices. Our innovative designs allows for complete access by one person to service your taller backflow assemblies, irrigation controllers or other taller valuable equipment.

(See back page for sizing information)

# GUARDSHACK™

Enclosures that Work Beautifully!

1-800-266-5411

[www.GuardShackEnclosures.com](http://www.GuardShackEnclosures.com)

## ECONO-CAGE™

Our Econo-Cage™ is newly redesigned and offers the same quality as their big brother GuardShack™ line, but constructed of lighter tubular steel. This economical enclosure is beautiful yet extremely rugged and easy to install. The Econo-Cage™ are lift-off style models which increases the amount of usable internal space. The Econo-Cage™ offers the same warranty as the Guardshack line.

(See back page for sizing information)

## CLOCKGUARD™

Like the Econo-Cage™, our ClockGuard™ has been redesigned with tubular steel to give you a safer and attractive way to protect your irrigation controllers or other wall mounted equipment. Internal hinges add to the security. Powder-coated grey standard.

## ENCPAD™

Save yourself the time, trouble and the expense of pouring a concrete pad for your backflow assembly.

**Use A Pre-Manufactured EncPad™!**

Please see our accessory sheet for further information and sizing specifications on our pre-manufactured enclosure pads.

# GUARDSHACK™

## HGS SECURITY ENCLOSURE

**The HGS Series is our most secure GuardShack Enclosure yet!**

The HGS is constructed with strong schedule 40 steel pipe and expanded metal. They come standard with our improved integrated Lock Shield Bracket designed to protect more styles of locks from bolt cutters.

### Internal Mounting:

On the HGS all mounting points are internal and cannot be accessed unless the cage is opened. To deter prying of the cage, there is only a 3/8" gap between the pad and the enclosure.

### Hinged With Gate:

Our body with gate design allows for full use of the HGS's internal dimensions, eliminating any clearance issues often allowing a smaller enclosure to be used. Additionally with this design, only one lock is needed.

### Quick & Easy Installation:

For maximum security and easy installation the optional enclosure setter is available. Simply bolt the cage to the setter with the provided hardware, set in wet concrete and walk away!

# COAST GUARDSHACK™

## STAINLESS STEEL ENCLOSURES

The Coast GuardShack™ Stainless Steel enclosure line offers extensive protection for a wide variety of applications.

Coast GuardShacks™ are made of 304 stainless steel, electropolish treated to dissolve rustable carbon and are sandblasted for a smooth finish. Coast GuardShack™ Enclosure's pioneering design ensures there are never any sharp corners or edges.

Most Coast GuardShacks™ enclosures, come standard with LockShield™ Brackets for maximum protection from bolt cutters and have an 8 year limited warranty. Our Enclosures come complete with all the necessary hardware to secure to our pre-manufactured EncPad™ Enclosure Pads or any concrete base.

### Small and Large Stainless Steel Enclosures

- ◆ Rugged construction prevents vandalism and theft
- ◆ Unique, beautiful design safe for children and pedestrians
- ◆ Complete access for testing and service work
- ◆ Standard LockShield Brackets for maximum protection from bolt cutters
- ◆ Less than one hour installation time, using our pre-manufactured Enclosure Pad, the EncPad™
- ◆ FrostGuard™ Insulated Blankets available to protect assembly from occasional cold snaps
- ◆ Custom enclosures available

## Small Coast GuardShack™ Enclosures

Just like our small GS series line, our CGS line of small enclosures can accommodate nearly any ½" thru 2" backflow device as well as a wide range of valuable equipment like pumps, meters and automatic control valves. Electropolished 304 stainless steel makes these the perfect enclosures for coastal or wet locations. (See back page for sizing information)

## Large Coast GuardShack™ Enclosures

Backflow enclosures for large devices no longer have to be unsightly! GuardShack's attractive stainless steel 2 piece clamshell models open up to allow complete access to your 2½" thru 6" devices. Besides offering great vandal protection, these beautifully designed enclosures gracefully enhance the appearance of any building or grounds that they are installed at.

(See back page for sizing information)

CGS-NP-1.5	24" W x 40" H x 38¼" L	HINGED/GATE	N/A

It's no surprise that BPD's two most popular Stainless Steel sizes are the CGS-1 and CGS-2 models. Over four dozen different backflow assemblies fit inside these rugged yet attractive units, since these lift off models allow full use of the interior space. Both of these models, plus the tiny CGS-.5, are also very popular for light and battery powered timers, air/vacuum relief valves, gas valves and more. All units are also often used to cover dangerous, hard-to-see pedestrian trip hazards. All tamper proof SS hardware is supplied with unit.

### Also Available for your SS Lift Off Model Enclosures:

- **EncPad™** Enclosure Pads - The pre-manufactured enclosure pad that's **better** than concrete. Now lift-off enclosures install in less than 1 hour, **without concrete**. The **EncPad™** is a heavily ribbed, yet lightweight and resilient UV stabilized meter box type plastic pad, with a cut out to fit over an assembly. It uses the GuardShack **PadLok™** anchoring system to securely clamp the pad to the pipe risers. The **EncPad™** removes and replaces in just minutes in the case of a leak under the pad, and is virtually indistinguishable from actual concrete.
- **FrostGuard™** Insulated Blankets - Now in R-13 & R-30 models are perfectly sized to fit inside your **Coast GuardShack™**, (see above).
- **LockShield™** **Brackets** - Designed to safeguard a unit from bolt cutters.

### FABRICATION SPECIFICATIONS:

1¼" Sch 10 A.S.T.M.-A-312 Gr.A.E.W. 304 Stainless Steel pipe for end frames  
 1" x 1" x 1/8" 304 Stainless Steel angle iron base, raised 3/8" above slab  
 ½" #13 ga. diamond pattern flat rolled expanded 304 Stainless Steel with all welded construction 4" O/C. Expanded metal die formed for uniformity

All Stainless Steel products sand blasted to remove the sharp edges and burrs inherent to all SS expanded metal products. Finishes may vary due to the nature of sandblasting. All units given Electropolish treatment to draw out the (rustable) free carbon from enclosures for the best possible rust free finish available

### WARRANTY:

**GuardShack™** warranties this product for eight (8) years from date of purchase to be free of defects in material and workmanship. All claims must be made known to **GuardShack™** in writing within 30 days of the defect becoming known to the purchaser. There are no warranties that extend beyond those described herein, either expressed or implied. **GuardShack™** reserves the sole right, at it's own option, to repair or replace any defective product, and shall exclude any damage caused by accident, misuse or abuse of the product. In no case shall **GuardShack™** be liable for any incidental or consequential damages what-so-ever.

# GUARDSHACK™

## ACCESSORIES

GuardShack Enclosures has more to offer than backflow cages. We have a great selection of associated products to compliment our line of the most specified enclosures in the industry.

### Some Of Our Top Selling Accessories:

**FrostGuards:** Further Protect Your Expensive Assemblies From Frost and Freeze With Our R13 & R30 Insulated Blankets

**EncPads:** Save Time and Money During Installations With Our Pre-Manufactured Backflow Enclosure Pads

**Pipe Supports:** Provide Added Strength For Longer Assemblies

**LockShield Brackets:** Added Protection Against Bolt Cutters

**All-Weather Padlocks:** Our locks are designed to withstand the elements that can normally rust and destroy padlocks

## FROSTGUARD™

### FrostGuard Insulated Blankets:

For excellent frost protection of your expensive assemblies, we offer the **FrostGuard Insulated Blanket**. Our rugged double stitched FrostGuards are insulated with top quality R13 or R30 value insulation.

They come standard in 9 different sizes that will accommodate almost any assembly. A standard padlock grommet helps to secure your FrostGuard while its great UV properties allow you to leave the blanket on year round! (see back page for sizing chart)

## BlackJack Adjustable Pipe Supports

APS come standard with a "Set and Forget" hex adjustment nut with locking set screw for safety. We offer pipe supports in different sizes to accommodate pipes and valves up to 18". They come powdercoated black and in a wide variety of sizes, for different applications. All Hardware Is Included.

(See back page for sizing chart)

## All-Weather Padlocks

Our high security brass and thermoplastic coated padlocks come with a key hole cover and "O" rings to help keep out dirt and debris, and prevent rust. Single packs are perfect for Hinged Model Enclosures, and Double Packs are perfect for Lift-Off, Gated and Clamshell model enclosures.

Available In:  
Single Packs: Keyed-Different  
(GS-AWKD)  
or Double Packs: Keyed-Alike  
(GS-AWKA)

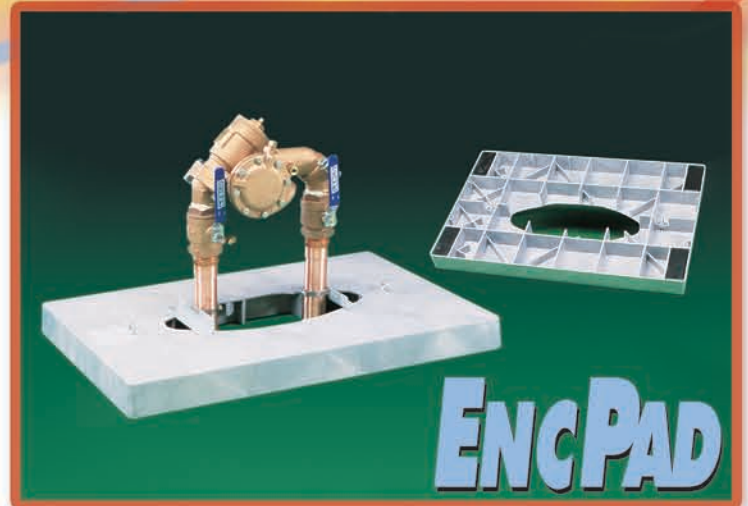

# GUARDSHACK™

## ACCESSORIES

### EncPad™

#### **Manufactured Enclosure Bases**

The **Encpad™** enclosure pad is designed to drastically reduce the amount of time it takes to install an enclosure; down to fi an hour in most cases. Our **Encpad™** is constructed of ultra tough, resilient HPDE and is virtually indistinguishable from an actual concrete slab. It comes pre-cut for your application and complete with all the hardware necessary to install. It can be used with many of our GuardShack™ & Econo-Cage™ models. (See back page for sizing chart)

Never pour concrete again! Never a second trip to the jobsite to finish an installation!

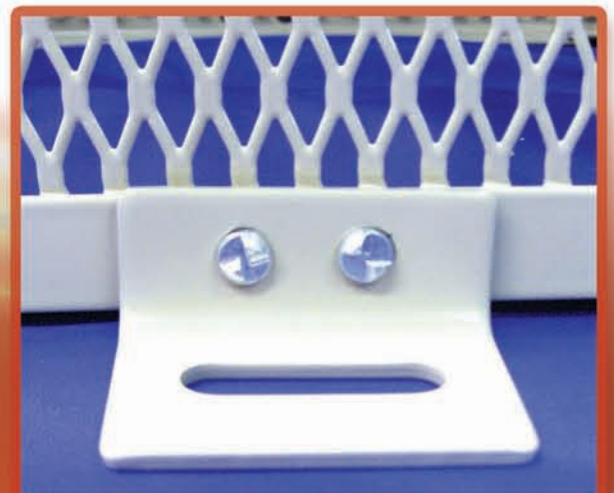

### LockShield Brackets

For extra protection against theft, we offer our **LockShield Brackets**. These attach to our enclosures and are designed to ward off bolt cutters. They can be ordered with new enclosures as well as retro-fitted for previously purchased GuardShacks. These come in standard powdercoated colors to match your GuardShack.

### Bolt On Brackets

**Bolt On Brackets** are designed to convert your hinged GuardShack into a lift-off model for maximum use of internal dimension. These come in standard powdercoated colors to match your GuardShack.

# GUARDSHACK™

## VALVE STEM PROTECTORS

### GS-VSP SERIES

### Thieves Are Now Stealing The Brass Stems From Your Gate Valves

This disables your valve and causes extremely expensive repairs.

## SECURITY FEATURES:

The GS-VSP secures on top of the gate valve, over the stem, shielding it from thieves. To keep up with fire code, it has drilled holes in the steel tubing which allows visual confirmation that the valve is open.

Each GS-VSP comes with keyed alike locks for added convenience.

## AFFORDABLE ATTRACTIVE SECURITY:

GS-VSPs are extremely affordable and blend in with the assembly seamlessly.

We offer 4 models to cover 3"-12" Gate Valves with or without tamper switches and are powdercoated black to the same specifications as our enclosures.

## EASY TO INSTALL:

GS-VSPs are AMAZINGLY simple to install. In less than 5 minutes you can secure your assembly.

The body simply slides over the stem, then the GS-VSP-1/GS-VSP-2 are secured through the yoke while the GS-VSP-3/GS-VSP-4 are secured under the hand wheel.

MODEL	FOR USE WITH MOST OS&Y VALVES	WORKS W/ TAMPERS
GS-VSP-1	3" - 4"	NO
GS-VSP-2	6" - 12"	NO
GS-VSP-3	3" - 4"	YES
GS-VSP-4	6" - 12"	YES

...with all the copper and brass theft across the country, especially with backflow assemblies. Replacing them is expensive, inconvenient, and disruptive to the people, equipment, and landscaping that needs uninterrupted service.

GuardShack has developed the first and only alarm system designed specifically for backflow enclosures. A blinking red LED light warns potential thieves that the enclosure is armed. When tampered with, it gives off an ear piercing sound. To set it off, the enclosure must be raised about three inches, which eliminates false alarms when the enclosure is locked down.

**Features:**

- **Low Cost**
- **Easy to Install**
- **Retrofits to existing GuardShack units (clamshell models require 2)**
- **Battery powered ( no trenching, no electrical lines, no electricians)**
- **Easy to maintain (change batteries once a year when device is serviced or tested)**
- **Tamper resistant ( trying to disable device will set it off)**
- **Constantly blinking red LED light discourages would-be thieves**
- **Keyed on/off for service**
- **Ultraviolet and moisture resistant case**
- **Includes all mounting hardware**
- **Patented**
